Subject: Information to get information on smoke and large fires in Oregon

Hello,

Just want to send out some locations where the public can get information on smoke and large fires in Oregon. The smoke in Central Oregon is not only from the Milli Fire. Sixteen large fires or fire complexes are burning across Oregon. Due to current and forecasted weather conditions, we do expect to see continued growth on many large fires resulting in persistent smoke in our area for several days.

For Regional questions or information people can contact:

NW Large Fire information – [503-808-2764](tel:503-808-2764)
