

# Water and Sewer SDCs Update Presentation

March 12, 2024

# AGENDA

- ❖ History and Background
- ❖ Policy issues concerning SDCs
- ❖ Specific details of the analysis
- ❖ SDCs in neighboring communities
- ❖ Next Steps

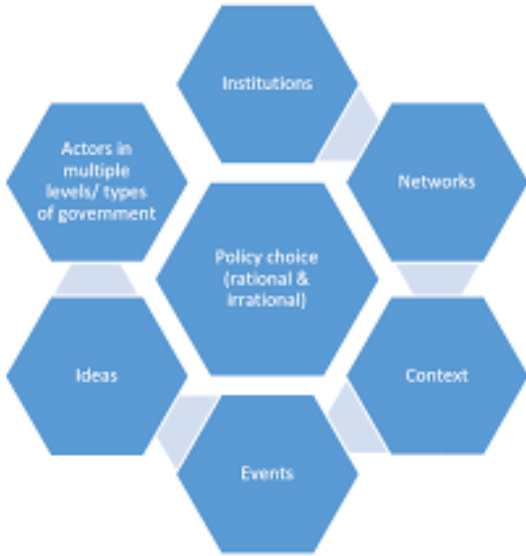

# HISTORY & BACKGROUND

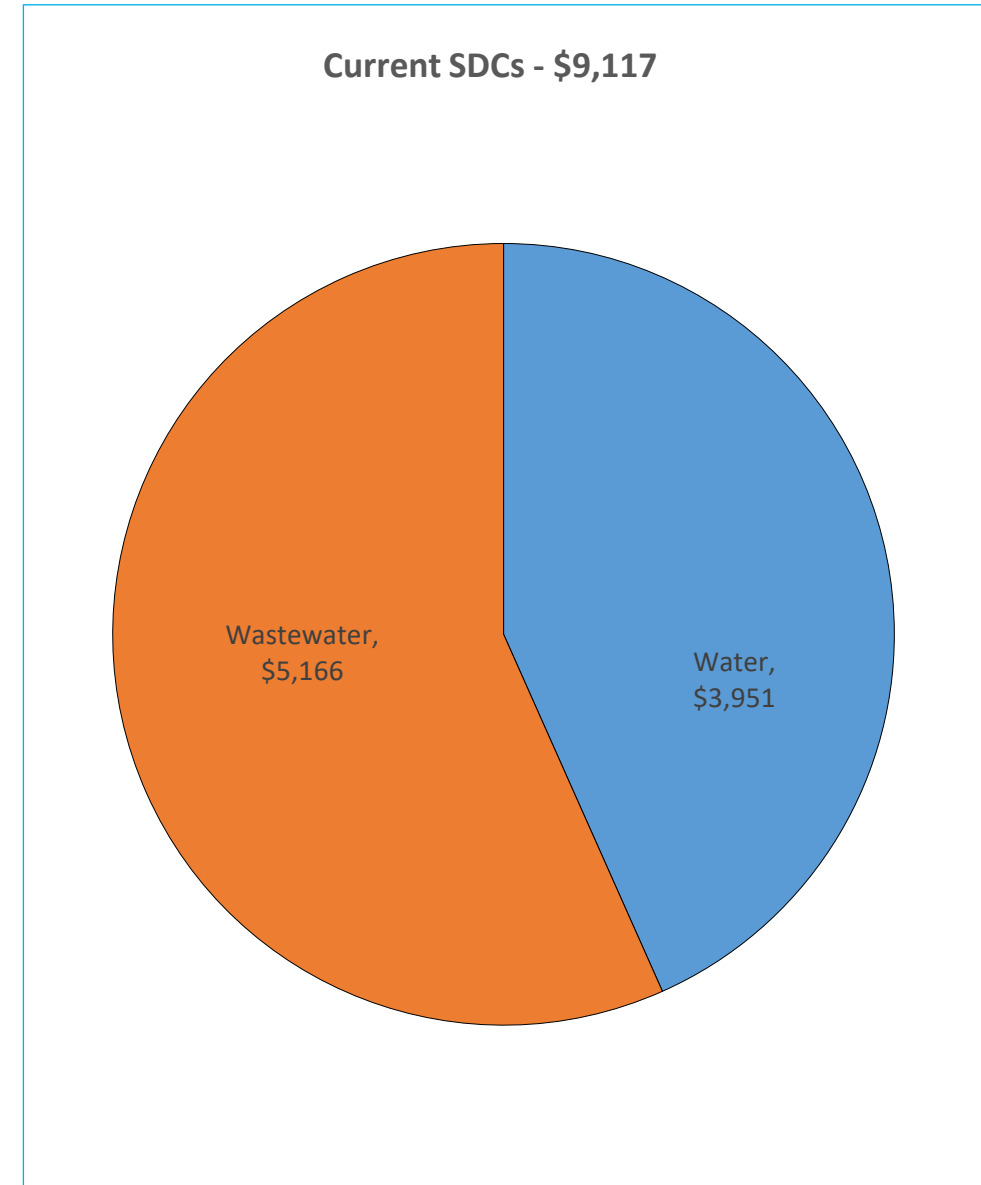

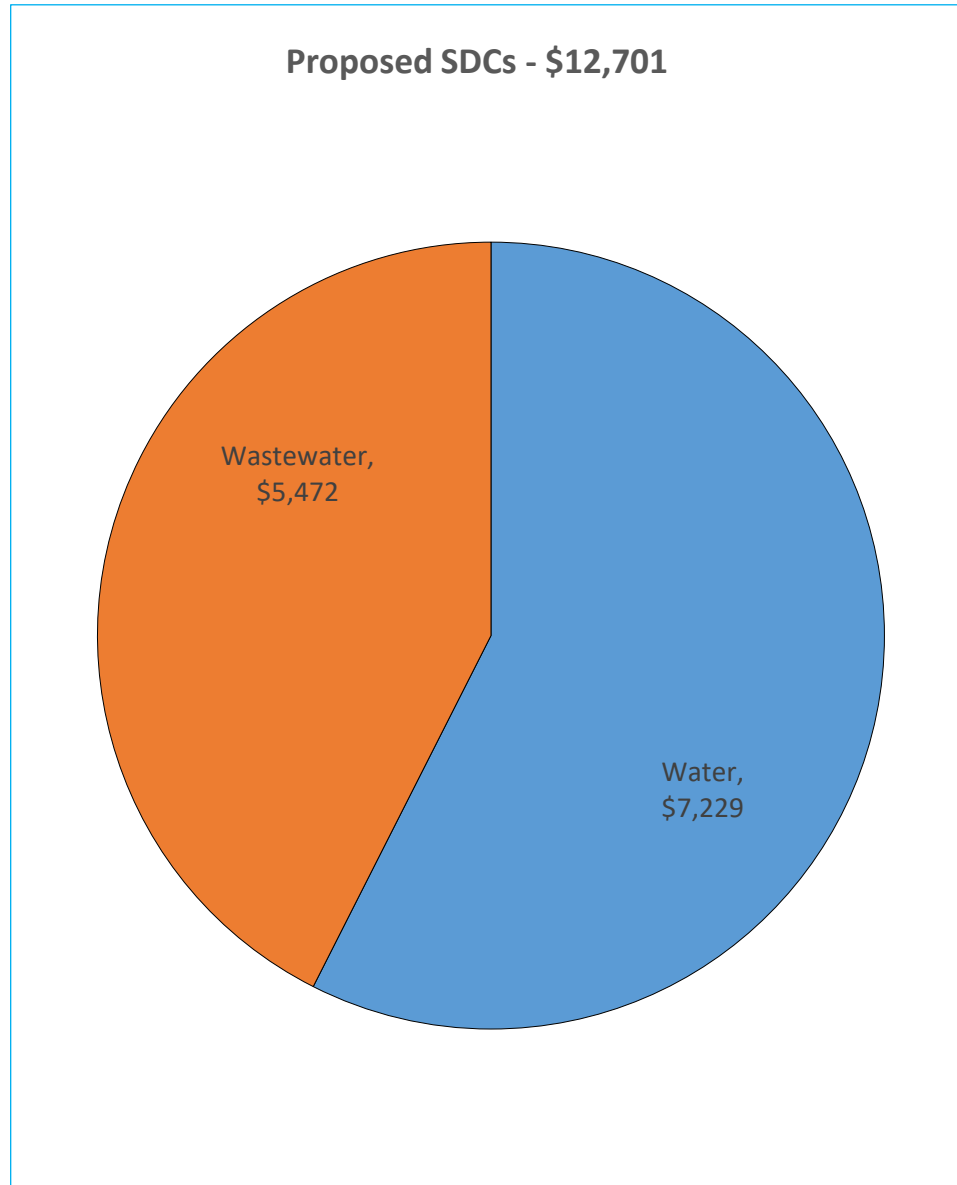

- Current water and sewer SDC methodologies reviewed & adopted by the City Council in May 2018 (Resolution No. 2018-03)
- This SDC study employs the currently adopted SDC methodologies
- New water and sewer master plans have been completed and adopted by the City Council in June 2023 (Ordinances 530 and 531, respectively)
- Council historical policy to update SDCs when new master plans have been completed and adopted

# POLICY

- SDCs are not charged to rate payers
  - ✓ SDCs are one-time fees charged to new development at the time of permit issuance
  - ✓ By statute SDCs consist of two unique fee components: a reimbursement fee and an improvement fee
- SDCs are “restricted” revenues and can only be spent on capacity expanding projects or the portion of project costs that expand capacity
- SDCs do have an impact on infrastructure development and the composition of our future tax base.
- The Council’s policy on SDC pricing must strike a balance between the philosophy of “growth pays for growth” and the goal of attracting smart growth and living wage jobs
